

## Felting Needle Selection Chart

This chart provides a simple comparison of the six types of felting needles carried by **Shuttleworks**. It is not definitive, as each needle felter will develop a preference for one needle over another depending on their personal felting style and type of project.

- Extra Fine** (15x18x40x3" RBA)  
Fine work, small holes
- Star** (15x18x38x3" SBA)  
Fine to medium work, small holes
- Fine** (15x18x38x3.5" RBA)  
Fine to medium work, larger holes and indentations
- Medium** (15x18x36x3.5" RBA)  
Medium to heavy work, larger holes but small indentation
- Coarse** (15x18x32x3" HDB)  
Heavy work, medium indentations, for a coarse needle this is a nice needle, holes and indentations are medium, needle is easy to punch in
- Coarse** (15x18x32x3.5" RB)  
Heavy duty work, good for preliminary work on larger projects, harder to punch in but goes in a long way due to its extra length
